Cancellation Policy

We require **4 business days** cancellation notice. Please call 905-823-0223 to reschedule or cancel. Our office hours are Monday to Friday 8am to 4pm. Cancellation or rescheduling with **less than 4 business days** notice will result in a **\$150.00 charge**. We require 4 days business days in order to book someone else with adequate time to do the preparation. Thank you for understanding.

What is a colonoscopy?

Colonoscopy is a procedure in which a long flexible tube is inserted through the anus in order to examine the colon and rectum for abnormalities such as polyps, ulcers and tumors. Colonoscopy will be done under sedation given by an Anesthesiologist. This is not general anesthesia. In order to ensure a successful procedure, bowel cleansing is required. This is achieved by drinking ALL the bowel preparation and drinking large amounts of extra fluids such as water. A poor preparation may result in missed polyps and cancer. A repeat procedure may need to be done with extra bowel cleanse.

How do I get ready for my colonoscopy?

One Week Before The Colonoscopy:

1. In order to have a smooth bowel cleanse start a low-fibre diet.

Avoid the following:

- Corn
- Popcorn
- Nuts
- Seeds such as poppy, flax, sesame, etc.
- Fruits such as kiwi, raspberries, strawberries, tomatoes and any other with small seeds.
- Fibre supplements such as Metamucil®.

**If any seeds are left behind in the colon, they may block our instruments. **

2. Purchase **PegLyte** (box or jug) and **Bisacodyl/Dulcolax** (3 pills). These are over the counter medications available at any pharmacy. No prescription is required.

One Day Before The Colonoscopy:

DO NOT EAT ANY SOLID FOOD, ORANGE JUICE OR DAIRY from the minute you wake up. Only drink clear fluids the entire day. You must drink an extra 2-3L with the bowel prep. The more you drink, the cleaner the colon!

Clear fluids include the following:

- Plain water and/or flavoured water
- Clear broth or soup
- Black tea and/or black coffee (limit 1-2 cups). **DO NOT** use milk, cream, or milk products
- Juices (no pulp) such as apple, white grape, white cranberry
- Gatorade® Powerade® Kool-Aid®
- Carbonated drinks such as ginger ale, 7-Up®, Sprite®
- Popsicles
- Plain Jell-O

DO NOT drink red, purple, blue, or green coloured fluids.

Drinking the preparation:

1. At **8 am** take **3 Bisacodyl/Dulcolax** pills with water. Do not chew or crush the pills.
2. Prepare the **Peglyte** solution. If you purchased the jug containing 280g of powder, add water to the fill line (total volume 4 litres). Replace cap tightly and mix well until all ingredients have dissolved. Put it in the fridge. If Peglyte is in a box of 4 sachets, mix one sachet in 1 litre of water and stir rapidly to dissolve. Repeat for each sachet. Keep refrigerated for optimal storage and to improve the taste.
3. At **5:00pm** start drinking the first litre of Peglyte. Drink one glass every 10-20 minutes until finished. Try to finish the solution in 1-1.5 hours. Repeat with the 2nd litre at **7:00 pm**, and 3rd litre at **9 pm**.
4. **DRINK LOTS OF EXTRA FLUIDS!!!!!!**

You may have some cramping and begin to have watery bowel movements 1-2 hours after drinking the solution. If you feel nauseated, you may take Gravol.

On The Day Of The Colonoscopy:

1. Continue fasting, no solid food. **Clear fluids only.**
2. **6 hours before your appointment time**, drink the last litre of **PegLyte** the same as before. You will have to get up very early to do this. Make sure to drinks lots of extra fluids. Ideal bowel prep is when your **bowel movements are clear and/or light yellow**. If it is still brown, please drink more fluids.
3. **STOP DRINKING ALL FLUIDS 2 HOURS BEFORE YOUR ARRIVAL TIME.** This includes no smoking and no gum.

If you are having a Gastroscopy with the Colonoscopy, STOP DRINKING ALL FLUIDS 4 HOURS BEFORE YOUR ARRIVAL TIME.
